Profile

Software Developer with experience building operational systems, business management platforms, reporting solutions, automation tools, and AI-powered applications. Delivered software solutions across mining operations, inventory management, business administration, and educational platforms. Passionate about building systems that improve operations, reporting, visibility, and data-driven decision-making.

Professional Experience

- | | |
|---|--------------------------------------|
| National Service Personnel, Adamus Resources Limited | 12/2025 – Present
Nkroful, Ghana |
| <ul style="list-style-type: none">Improved an existing vehicle checklist system by implementing comprehensive reporting features to support management and operational decision-making.Designed and integrated structured reports for planners, enhancing visibility into vehicle conditions, usage, and maintenance needs.Expanded the system to include mining equipment checklists (e.g., excavators, dump trucks), extending its applicability beyond support vehicles.Contributed to improving operational efficiency and data-driven decision processes within the organization. | |
| Backend Development Intern, University of Mines and Technology - SRID | 10/2023 – 11/2023
Takoradi, Ghana |
| <ul style="list-style-type: none">Developed secure RESTful API for Hostel Management System using Node.js, Express, and MongoDB. Participated in code reviews and remote collaboration sessions | |
| Freelance Web Developer, BYF Consulting Ghana | 06/2025
Accra, Ghana |
| <ul style="list-style-type: none">Built and deployed the company website (byfconsultinggh.com 🌐), showcasing services, divisions, training programs, and vacancies.Developed dynamic pages with interactive forms for job applications, staffing requests, and newsletter subscriptions.Ensured responsive design and smooth navigation across all sections (Home, About, Services, Training, Vacancies, Contact). | |

Projects

- | | |
|---|-------------------|
| Backend Developer 🌐 ,
<i>AI-Powered LMS with Mental Health and Wellness Support</i> | 07/2025 – 09/2025 |
| <ul style="list-style-type: none">Built backend APIs for an AI-enhanced LMS using Node.js, Express, and MongoDB.Integrated Gemini AI for automated quiz generation and intelligent content support.Developed and connected a mental health chatbot that provided students with AI-driven emotional support and wellness guidance. | |

- Collaborated with a colleague via GitHub throughout the backend development and integration process.

Full-Stack Developer , *Drug Inventory Management System*

07/2025 – 09/2025

- Built full-stack features using Node.js, Express, MongoDB, React.js, and Redis for real-time inventory tracking and facility-specific access control.
- Implemented AI-powered drug redistribution leveraging OpenAI API to optimize allocation of near-expiry drugs across facilities.
- Implemented QR code scanning and AI-powered redistribution to reduce manual errors and optimize near-expiry drug allocation.
- Developed role-based dashboards, reports, and WebSocket-driven notifications for Admins, Pharmacists, Supervisors, and Staff, improving operational awareness.

Skills	
Node.js, Express.js, React.js, Redux	MongoDB, SQL, Redis
LLM integration	WebSocket / Socket.io
Data visualization	Git/GitHub
Teamwork	Problem-solving
Attention to detail	Network Troubleshooting

Education	
Bsc. Computer Science and Engineering, <i>University of Mines and Technology, SRID.</i>	01/2022 – 09/2025 Takoradi, Ghana
West African Senior School Certificate, <i>Ghana Secondary Technical School</i>	10/2017 – 09/2020 Takoradi, Ghana
